## OVERVIEW

Cloud and DevOps-focused software engineering intern with a strong research-driven mindset, experienced in building and optimizing serverless and multi-cloud infrastructure. Hands-on experience with cloud performance benchmarking, FaaS platforms, and distributed systems across AWS and Azure. Proficient in automation, CI/CD pipelines, containerization, and infrastructure-as-code to design scalable, reliable, and production-ready cloud environments. A curious problem-solver passionate about modern cloud ecosystems, observability, and building resilient, high-performance infrastructure systems.

## EDUCATION

### Ajeenkya D Y Patil University, Pune

Aug 2022 - June 2026

Bachelor of Technology, Information Technology

- **GPA:** SCGPA: 10 (SEM-8) | CGPA: 9.91

### Sri Chaitanya Jr. Kalasala, Hyderabad

Apr 2020 - May 2022

Intermediate Education

- **Percentage:** 93.9

### Sri Chaitanya High School, Hyderabad

Apr 2019 - Mar 2020

Higher Secondary Education

- **Percentage:** 87.6

## TECHNICAL SKILLS

- **Cloud Services:** AWS Console Management, Azure Portal Management, Google Cloud Platform
- **DevOps Tools:** Git/GitHub, Terraform, Docker, Kubernetes (Basics), Ansible (Intermediate), GitLab (Basics), Redis
- **Programming Languages:** Python, SQL, Shell Scripting, Java(Basics)
- **Development:** HTML, CSS, Tailwind CSS, JavaScript, Node.js, Express, EJS
- **CS Fundamentals:** DSA, DBMS, OS, CN
- **Databases:** MySQL, MongoDB
- **AI / ML & GenAI:** ML Fundamentals, Generative AI (LLMs), Prompt Engineering, AI Workflow Design, MLflow
- **Operating Systems:** Linux (Ubuntu, RHEL), Windows
- **Soft Skills:** Effective communication, Problem-solving, Time management, Critical thinking, Collaboration

## EXPERIENCE

### Marquardt India Pvt. Ltd.

Jun 2025 - Sep 2025

Web Dev Intern

Pune

- Developed and supported internal web applications, gaining exposure to deployment pipelines and monitoring
- Worked on backend services using **Express.js** and **MySQL**, improving performance and reliability
- Performed debugging, testing, and optimization using **Git/GitHub**
- Built **Jenkins CI/CD pipelines** to automate Docker-based deployments, enhancing release efficiency

### Seamless Education and Services (Seamedu) Pvt. Ltd.

Mar 2025 - Jun 2025

IT Intern- Placement Coordinator, IT Department

Pune

- Managed end-to-end placement operations including scheduling drives, maintaining databases, and tracking hiring metrics
- Improved coordination between students, faculty, and recruiters using digital and cloud-based tools
- Supported process optimization and integration of IT solutions to enhance efficiency and data accuracy

### Indian Institute of Technology Ropar, Punjab

May 2024 - Jul 2024

Cloud Research Intern

Rupanagar, Punjab

- Worked on distributed systems and serverless architectures under faculty mentorship
- Implemented and evaluated **XFBench & XFaaS** for FaaS benchmarking
- Built and deployed scalable serverless functions on cloud platforms
- Performed performance profiling, bottleneck analysis, and workload optimization
- Selected for **IAS Summer Research Fellowship 2024**

## PROJECTS

---

### Multi-Cloud SaaS Orchestration Platform

Built and deployed a cloud-native multi-cloud orchestration platform using Docker and Terraform, integrating AWS, Azure, and GCP APIs with automated data synchronization via Celery and Redis; developed a scalable FastAPI backend with PostgreSQL and JWT authentication, and designed a CI/CD-ready architecture ensuring reliable, production-grade deployments. [GitHub](#)

### Quantum Cloud Integration

I developed a **hybrid cloud-quantum system** that seamlessly integrates classical cloud computing with quantum processing to achieve enhanced computational efficiency. The workflow enables interoperability between traditional cloud services and quantum systems, providing secure and scalable solutions. This hybrid architecture is implemented using **AWS** for cloud infrastructure, **IBM Quantum** for quantum resources, and **Docker** for containerization, ensuring flexible deployment and robust integration across platforms. [GitHub](#)

### Rural Gyan Platform

I developed a comprehensive **full-stack educational management system** featuring role-based dashboards, integrated AI-powered tools, and bilingual (English/Hindi) support. The platform offers streamlined admin, teacher, and student workflows, including live virtual classes, automated quiz grading, real-time analytics, AI-assisted tutoring, and activity monitoring. The tech stack includes **React.js** and **Tailwind CSS** for the frontend, **Node.js**, **Express.js**, and **Socket.io** for the backend, and **MongoDB** for data storage. Secure authentication is implemented using **JWT**, with AI functionalities powered by **OpenAI API** and **TensorFlow.js**. Translation is enabled via the **Google Cloud Translate API**, and the system is deployed using **Docker** and **Nginx** for scalability and reliability. [GitHub](#)

## AWARDS

---

- **SOF International Mathematics Olympiad:** School Rank: 3rd (2019)
- **Seamedu Awards 2025:** Creative Cloud Integration Award
- **IBM ICE Day Ideathon 2025:** Bronze Medal
- **Seamedu Awards 2026:** Multi Cloud Excellence Award

## CERTIFICATIONS

---

- **Fortinet Certified Fundamentals in Cybersecurity:** Fortinet
- **Fortinet Certified Associate in Cybersecurity:** Fortinet
- **Fundamentals of Cybersecurity (EDU-102):** Zscaler
- **Zero Trust Certified Associate (ZTCA):** Zscaler
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate:** Oracle
- **AWS Services for Solutions Architect Associate:** Udemy

## PUBLICATIONS

---

- **Title:** “Democratizing AWS Cloud Operations: A Unified Orchestration Approach To Standardized Infrastructure Management”
- Published in *International Journal of Creative Research Thoughts (IJCRT)*, Vol. 14, Issue 4, April 2026
- DOI: <https://doi.org/10.56975/ijcrt.v14i4.305033>
- Proposed Nebula, an AWS orchestration platform integrating provisioning, monitoring, and cost observability
- Designed asynchronous execution framework using Celery & Redis for scalable cloud operations
